PROFILE SUMMARY

With a background spanning two years in the IT industry, I specialize in C#, JavaScript, and competitive coding. Proficient in Software Development Life Cycle (SDLC) methodologies, including Agile and Waterfall models. Skilled in building projects using a diverse range of technologies, such as Python, Java, C#, JavaScript, Bootstrap, Angular JS, Elastic Search, and tools like Postman.

EDUCATION HISTORY

Graduation

Course	B.Tech/B.E.(Information Technology)
College	Ramrao Adik Institute of Technology, Navi Mumbai
Year of Passing	2021

WORK EXPERIENCE

Sep 2021 to Nov 2023

Software Developer at GEP

Full stack development role. Working on frontend and backend both. For frontend Angular js was used and for the backend .net was used. To bridge the gap in frontend and backend Camunda was used where we designed the whole flow of operations which was a javascript based tool.

- Postman
 - React.js
 - Django Framework
 - Visual Studio
